

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in this application:

Listing of Claims

1. (Currently amended) A method for displaying on a screen an interactive electronic program guide (IPG) comprising the steps of:

displaying a plurality of television program listings in a first area of the screen as a grid of two-dimensional cells, the displayed grid having a plurality of channels displayed in a first dimension and time displayed in a second dimension;

simultaneously displaying with the program listings an action control glyph in a second area of the screen;

selectively marking one of the cells corresponding to one of the displayed plurality of channels;

activating the action control glyph responsive to a user command; and

responsive to the activation of the action control glyph, rotating the grid of two-dimensional cells so that the one of the displayed plurality of channels is displayed in the second dimension and time is displayed in the first dimension.

2. (Original) The method of claim 1 further comprising the step of displaying a title of a program in each cell.

3. (Original) The method of claim 1 wherein the displayed rotated grid includes an additional cell on the time dimension displaying an additional program for the displayed channel.

4. (Original) The method of claim 1 further comprising the steps of displaying a second action control glyph in the second area and activating the second action control glyph to rotate the grid of two-dimensional cells back to its original format so that the plurality of channels are displayed back in the first dimension and time is displayed back in the second dimension.

5. (Original) The method of claim 1 further comprising the step of displaying a contextual help window and displaying contextual help data associated with an interactive area in the contextual help window as the cursor moves to the interactive area.

6. (Original) The method of claim 5 wherein the contextual help window is displayed in a fixed location within the IPG.

7. (Original) The method of claim 5 wherein the step of displaying contextual help data comprises of displaying text data for informing a user of actions that can be done.

8. (Original) The method of claim 1 further comprising the step of displaying a video window within the IPG for a currently-tuned television program.

9. (Original) The method of claim 1 further comprising the step of displaying a video window within the IPG for a future-scheduled television program.

10. (Original) The method of claim 2 further comprising the step of selecting a title of a program from the displayed grid and recording the selected program when it is telecast.

11. (Original) The method of claim 2 further comprising the step of selecting a title of a program from the displayed grid and tuning to the selected program when it is telecast.

12. (Original) The method of claim 1 further comprising the step of accessing a related Internet site from the IPG.

13. (Original) The method of claim 1 further comprising the step of purchasing a pay-per-view channel.

14. (Original) The method of claim 1 further comprising the step of purchasing a merchandise.

15. (Currently amended) An interactive electronic program guide (IPG) displayed on a screen comprising:

a plurality of television program listings displayed in a first area of the screen as a grid of two-dimensional cells, the displayed grid having a plurality of channels displayed in a first dimension and time displayed in a second dimension;

an action control glyph simultaneously displayed
with the program listings in a second area of the screen;

an input device for selectively marking one of the
cells corresponding to one of the displayed plurality of
channels and activating the action control glyph responsive
to a user command; and

a display processor for rotating the grid of two-
dimensional cells so that the one of the displayed plurality
of channels is displayed in the second dimension and time is
displayed in the first dimension responsive to the activation
of the action control glyph.

16. (Original) The IPG of claim 15 wherein the
input device is one or more of a keyboard, a remote
controller, a pointer device, and a voice activated device.

17. (Original) The IPG of claim 15 wherein each
cell includes a title of a program.

18. (Original) The IPG of claim 15 wherein the
displayed rotated grid includes an additional cell on the
time dimension displaying an additional program for the
displayed channel.

19. (Original) The IPG of claim 15 further comprising a second action control glyph displayed in the second area to rotate the grid of two-dimensional cells back to its original format so that the plurality of channels are displayed back in the first dimension and time is displayed back in the second dimension.

20. (Original) The IPG of claim 15 further comprising a contextual help window to display contextual help data associated with an interactive area as the cursor moves to the interactive area.

21. (Original) The IPG of claim 20 wherein the contextual help window is displayed in a fixed location within the IPG.

22. (Original) The IPG of claim 20 wherein the contextual help data is text data for informing a user of actions that can be done.

23. (Original) The IPG of claim 15 further comprising a video window displayed within the IPG for displaying a currently-tuned television program.

24. (Original) The IPG of claim 15 further comprising a video window within the IPG for displaying a future-scheduled television program.

25. (Original) The IPG of claim 16 further comprising means for selecting a title of a program from the displayed grid and recording the selected program when it is telecast.

26. (Original) The IPG of claim 16 further comprising means for selecting a title of a program from the displayed grid and tuning to the selected program when it is telecast.

27. (Original) The IPG of claim 15 further comprising an Internet connection for accessing a related Internet site from the IPG.

28. (Original) The IPG of claim 15 further comprising means for purchasing a pay-per-view channel.

29. (Original) The IPG of claim 15 further comprising means for purchasing a merchandise.
